Date

Signed by: Judy L. Hansen

Dear Sir:

Applicants wish to thank Examiner Berhanu for the courtesy extended to the Applicants' undersigned representative during the telephone conference on April 1, 2008 regarding the captioned United States patent application. During that interview, the Applicants' representative noted that the amendment made to independent claims 32 and 36 to add the term "electrolytic" is believed to distinguish the claimed invention from the prior art of record. "Electrolytic current flow" as that term is used in the pending claims refers to electrical current flow through a fluid or liquid, as described throughout the application as filed. Because the prior art does not disclose or suggest a sensing contact or sensing pin for detecting electrolytic current flow, the independent claims are believed to be in condition for allowance. And because the dependent

claims all properly depend from allowable claims 32 and 36, those claims are similarly in condition for allowance.

If a further telephonic conference would be useful in resolving any remaining issues in the application, the Examiner is invited to contact the Applicants' undersigned representative at 651-736-4050.

It is believed that no fee is due; however, in the event a fee is required; please charge the fee to Deposit Account No. 13-3723.

Respectfully submitted,

8 April 2008
